

# A COPY CARD FIRST

**SONICARD** The only copy card with  
microfilm sealed to the card ultrasonically.

**SONI CARD**

®

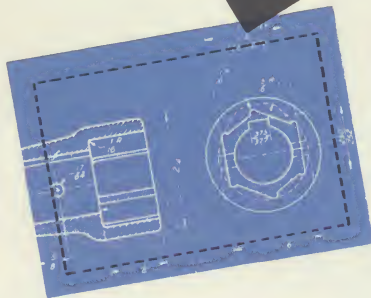

**DIVISION OF KLEER-VU INDUSTRIES, INC.**  
386 PARK AVE. SO., NEW YORK, N. Y. 10016 • 212-OR 9-5900

# SEE THE DIFFERENCE IN SONICARDS®

Compare the ultrasonically sealed Sonicard with  
any other copy card available.

**NOTE** the larger usable microfilm area...26% larger...for greater flexibility in reproduction.

**NOTE** the thin overlay border where film meets the card...there is no build-up.

**EMULSION**

The emulsion side of the film is always level with the card, into which it is recessed, giving better reproduction performance on all types of reproducing equipment.

**“LABORATORY TESTS have been performed for two years on the ultrasonic seal of the film to Sonicards. Results of these tests show that the bond improves with age and in no way deteriorates, as may happen with conventional cards, where adhesives are used.”**

**DIVISION OF KLEER-VU INDUSTRIES, INC.**

386 PARK AVENUE SOUTH, NEW YORK, N.Y. 10016 • PHONE 212 - OR 9-5900

**ULTRASONICALLY  
PRODUCED  
SONICARDS  
FEATURE:**

- 26% larger viewing area for greater clarity
- No film pop-off, strong, permanent bond
- No build-up of microfilm to aperture

**Lower in cost than any other quality micro image copy card on the market.**

***A free Test-Pak of 250 Sonicards is yours for the asking. Please indicate type of film desired, emulsion up or down.***
